EDUCATION

BSc Computer Science
Midlands State University
Faculty of Science & Technology
2nd Year — in progress

TECHNICAL SKILLS

- React, Vite, TypeScript
- Supabase (Postgres, RLS, Auth, Edge Functions)
- Tailwind CSS
- Cloudflare Pages deployment
- Anthropic API integration
- Git / Git Bash
- Python, Data Structures

COURSEWORK

- Software Engineering
- Database Systems
- Computer Architecture
- Discrete Mathematics
- Applied Statistics
- Physics for Engineers

CERTIFICATIONS (IN PROGRESS)

- CompTIA Security+
- AWS Certified Cloud Practitioner

CAREER FOCUS

DevSecOps — building toward the Zimbabwean job market

DARRELL JOHN

COMPUTER SCIENCE STUDENT • SOFTWARE DEVELOPER

PROFILE

Second-year Computer Science student at Midlands State University with hands-on experience building and shipping real software as a freelance developer. Independently built ZimClass, a school management platform, and have gone on to take on other development projects for clients. Still early in my journey and always looking to learn — comfortable picking up new tools, frameworks, and problem domains as projects demand.

PROJECT HIGHLIGHTS

ZimClass | *Founder & Developer*

- Independently designed and built a school management platform for Zimbabwean schools, from initial concept through to deployment.

Portfolio Management System | *FX Market Wizards (Pty) Ltd, Contract*

- Currently developing a portfolio management system for an FX/CFD investment firm as part of an ongoing contract.

Freelance Web Development | *Church & Community Clients*

- Designed and delivered websites for church and community clients.

EDUCATION

BSc Computer Science (In Progress) | *Midlands State University, Zimbabwe*
Faculty of Science and Technology — Second Year.
